DETAILED ACTION

Election/Restrictions

1. Claims 41-73 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 1-40, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, 1-40 are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, the restriction requirement as set forth in the Office action mailed on October 31, 2004 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claims including all the limitations of an allowable product claim or rejoined process claim are presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

2. Claims 1-73 are allowed.

The following is an examiner's statement of reasons for allowance: The following is an examiner's statement of reasons for allowance: Many references in the art disclose personal motion event monitor and digital motion analyzer and an accelerometer comprising sensor for detecting the mechanical vibrations generated by the motion and impacts of the multiple spheres within a spherical outer shell; a processor for analyzing the output signal from the sensor to determine if the activity in the sensor resembles a medical disorder or causal motion, such as that found in Johnson et al. (US 5,879,309) and Kim (US 5,694,340). But no prior art reference utilizes a system comprising a processor that is associable with a sensor for sensing dynamic and static accelerative phenomena of said body, said processor operable to process said sensed dynamic and static accelerative phenomena as a function of at least one accelerative event characteristic and an environmental representation to thereby determine whether said evaluated body activity is within environmental tolerance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
